## DETAILED ACTION

### **ART REJECTION:**

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,3-4,7, and 9-10 rejected under 35 U.S.C. 102(e) as being anticipated by Wang et al(6,445,087).

-- In considering claim 1, the claimed subject matter that is met by Sacca et al(Sacca) includes:

1) the powerline plug in electrical communication with a plurality of powerline outlets is met by the power strip(600) including electrical plug(610) in electrical communication with the plurality of electrical outlets(640);

2) the networking device including logic for isolating the outlets from network traffic is met by the built in coupling apparatus or PLT networking which includes filtering(see: column 6, lines 26-54).

-- With regards to claim 3, the housing is met by the housing of the power strip(600, figure 6).

Art Unit: 2612

-- With regards to claim 4, the logic configured to enable device to function as a network hub is met since the power strip itself would have constituted a network hub based on the connected devices with would have communicated via being connected to the network via the strip(600).

-- Claims 7, and 9-10 recite subject matter that is met Sacca as discussed above.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sacca et al(Sacca).

-- With regards to claims 2 and 8, the examiner takes Official Notice that in the electrical coupling art, use of surge suppression means for power strips is well known in the art, and therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate surge suppression means into the power strip(600) of Sacca, since the power strip of Sacca is utilized by sensitive electronic devices, and use of surge suppression means would have ensured that sudden power spikes would not have damaged the sensitive equipment.

Art Unit: 2612

***Allowable Subject Matter***

5. Claims 5-6, and 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
